Differential pressure switch Stainless steel switch enclosure Models DW, DW10

WIKA data sheet PV 35.42

Applications

- Pressure monitoring and control of processes
- Safety-critical applications in general process instrumentation, especially in the chemical and petrochemical industries, oil and gas industries, power generation incl. nuclear power plants, water/wastewater industries, mining
- For gaseous, liquid and aggressive media, also in aggressive ambience
- Filter and level monitoring

Special features

- No power supply needed for switching of electrical loads
- Robust switch enclosure from aluminium alloy or stainless steel 316L, IP66, NEMA 4X
- Setting ranges from 0 ... 16 mbar to 0 ... 40 bar with high static and high one-sided pressure up to 160 bar
- Ex ia version available
- 1 or 2 independent set points, SPDT or DPDT, high switching power up to AC 250 V, 20 A

Process Performance Series

ranges, model DW10

Fig. left: Differential pressure switch for medium/high setting ranges, model DW Fig. right: Differential pressure switch for low setting

Description

These high-quality pressure switches have been developed especially for safety-critical applications. The high quality of the products and manufacturing in accordance with ISO 9001 ensure reliable monitoring of your plant. In production, the switches are traced by quality assurance software at every step and subsequently are 100 % tested.

In order to ensure as flexible operation as possible, the pressure switches are fitted with micro switches. which enable the switching of an electrical load of up to AC 250 V, 20 A directly.

For lower switching power ratings, such as for PLC applications, argon gas-filled micro switches with gold-plated contacts can be selected.

All wetted materials are from stainless steel as a standard. For applications with special requirements on the wetted parts, a version with Monel® is available.

By using a diaphragm measuring system, the model DC differential pressure switch is extremely robust and guarantees optimal operating characteristics and the highest measuring performances, with repeatability lower than 1 % of span.

The process connection with a centre distance of 54 mm lower mount allows an easy and comfortable mounting of a standard valve manifold.

WIKA data sheet PV 35.42 · 03/2021

Page 1 of 6

Standard version

Model DW

Double diaphragm with transmission shaft, without sealing elements

Model DW10

Single diaphragm with transmission shaft, without sealing elements

For clean gas or non-condensing vapour only.

Switch enclosure

Stainless steel 316L, tamper-proof. Laser-engraved product label from stainless steel.

Ingress protection

IP66 per EN/IEC 60529, NEMA 4X

Switch contact

Micro switches with fixed dead band

- 1 x or 2 x SPDT (single pole double throw)
- 1 x DPDT (double pole double throw)

Micro switches with adjustable dead band

■ 1 x SPDT (single pole double throw)

The DPDT function is realised with 2 simultaneously triggering SPDT micro switches within 0.5 % of the span.

Permissible temperature

Ambient T_{amb} : -30 ... +85 °C Medium T_{M} : -30 ... +85 °C

Ignition protection type (option)

- Ex ia I Ma (mines)
- Ex ia IIC T6/T4 ¹⁾ Ga (gas)
- Ex ia IIIC T85/T135 1) Da (dust)
- The temperature class is related to the ambient temperature range. See the type examination certificate for further details.

Safety-related maximum values

(only for optional Ex ia versions)

| Maximum values | | | | |
|-------------------------------------|---------|--|--|--|
| Voltage U _i | DC 30 V | | | |
| Current I _i | 100 mA | | | |
| Power P _i | 0.75 W | | | |
| Internal capacitance C _i | 0 μF | | | |
| Internal inductance L _i | 0 mH | | | |

| Contact version | | Electrical r | Suitable for | |
|-----------------|---|--------------|--|--------------|
| | | | DC | Ex ia option |
| UN | 1 x SPDT, silver | 250 V, 15 A | 24 V, 2 A, 125 V, 0.5 A, 220 V, 0.25 A | No |
| US | 1 x SPDT, silver, hermetically sealed, argon gas filling 2) | 250 V, 15 A | 24 V, 2 A, 220 V, 0.5 A | Yes |
| UO | 1 x SPDT, gold-plated, hermetically sealed, argon gas filling ²⁾ | 125 V, 1 A | 24 V, 0.5 A | Yes |
| UG | 1 x SPDT, gold-plated | 125 V, 1 A | 24 V, 0.5 A | No |
| UR | 1 x SPDT, silver, adjustable dead band | 250 V, 20 A | 24 V, 2 A, 220 V, 0.5 A | Yes 3) |
| DN | 2 x SPDT or 1 x DPDT, silver | 250 V, 15 A | 24 V, 2 A, 125 V, 0.5 A, 220 V, 0.25 A | No |
| DS | 2 x SPDT or 1 x DPDT, silver, hermetically sealed, argon gas filling $^{\rm 2)}$ | 250 V, 15 A | 24 V, 2 A, 220 V, 0.5 A | Yes |
| DO | 2 x SPDT, or 1 x DPDT gold-plated, hermetically sealed, argon gas filling $^{2)}$ | 125 V, 1 A | 24 V, 0.5 A | Yes |
| DG | 2 x SPDT or 1 x DPDT, gold-plated | 125 V, 1 A | 24 V, 0.5 A | No |

²⁾ Permissible ambient temperature range: -30 ... +70 °C

Set point adjustment

The set point can be specified by the customer or factory-set within the setting range. Subsequent adjustment of the set point on site is made using the adjustment screw, which is fastened to the switch and thus secured against loss.

Repeatability of the set point

≤ 1 % of span

Distance between set points

For versions with 2 x SPDT the distance between the set points must be > 5 % of the respective span.

Please specify:

Set point, switching direction for each contact, e.g.: Set point 1: 3 bar, falling, set point 2: 6 bar, rising. With two micro switches, the set points can be set independently of each other.

For optimal performance we suggest to adjust the set point between 25 \dots 75 % of the span.

³⁾ WIKA recommends argon gas-filled contact versions, use of adjustable dead band allowed.

Example

Setting range: 0 ... 10 bar with one switch contact

Repeatability: 1 % of 10 bar = 0.1 bar Dead band: (see table setting ranges)

 $2 \times \text{repeatability} + \text{dead band} = 2 \times 0.1 \text{ bar} + 0.3 \text{ bar} = 0.5 \text{ bar}$ Rising pressure: Adjust set point between $0.5 \dots 10 \text{ bar}$. Falling pressure: Adjust set point between $0 \dots 9.5 \text{ bar}$.

Process connection

Stainless steel, lower mount (LM)

- ¼ NPT female (standard)
- ½ NPT, G ½ A, G ¼ A male via adapter
- ½ NPT, G ¼ female via adapter
- M20 x 1.5 male via adapter

Electrical connection

- ½ NPT female (standard)
- ¾ NPT, M20 x 1.5, G ½, G ¾ female
- Cable gland non-armoured, nickel-plated brass
- Cable gland non-armoured, stainless steel (AISI 304)
- Cable gland armoured, nickel-plated brass
- Cable gland armoured, stainless steel (AISI 304)
- MIL connector, 7-pin, DTL 5015

For cable connections to the internal terminal block use wire cross-sections between 0.5 ... 2.5 mm².

For the grounding cable connection to the protective conductor screws use max. 2.5 mm² for the internal screw and max. 4 mm² for the external screw.

Dielectric strength
